

# A STUDY IN SUCCESS

## Fortuity Case Study

**TITLE** - Design & Implementation of Technology Infrastructure Solution.

**CLIENT** - Dymax Corporation.

### Account Background

Dymax manufactures UV curing adhesives and UV curing equipment. They recently set up an office in Cork and appointed Fortuity as their technology partner in Ireland.

### Previous Situation

Dymax had been operating from a serviced office in Dublin and had no IT infrastructure in place. When they selected their new business location in Cork they required a complete Technology Infrastructure solution to be implemented.

### Concerns

As Dymax were in a complete start-up phase in Cork, the new technology infrastructure had to meet their growth requirements for the next 3-5 years. It was critical that Fortuity gained a good understanding of their technology requirements. Fortuity needed to ensure that the proposed solution was fully compatible with their existing global infrastructure standards.

### Solution

Fortuity had several meetings with the local management team in Ireland and their global IT Director. The outcome of these meetings was a detailed proposal from Fortuity. In this instance, Fortuity implemented a complete solution including infrastructure cabling and racking. The installation included Cat6 cabling and termination, Network racking, HP DL380 rack mounted servers running Windows Server 2016, Cisco Catalyst 2960 switches,

Dell 2500 Firewall, CISCO Aeronet wireless network, Networked managed UPS, Print, & Compute. E-mail was provided through MS Office 365. In addition, Fortuity configured an Intellicom hosted Voice solution for Dymax, including Yealink open platform SIP phones.

### Summary

This case study demonstrates the scope of our service offering. Whether you are in complete start up or a considering a major infrastructure upgrade, Fortuity have to capability to provide a complete solution to meet your needs.

Ciaran Walsh, Managing Director, Dymax Ireland
